PROFESSIONAL EXPERIENCE

Nashville Software School, Nashville, TN   05/2016 - 11/2016
Apprentice Web Developer
6 Month full time immersive software development bootcamp focusing on development fundamentals and problem solving.

- Full stack developer with an emphasis on Node.js (Socket.io), MongoDB/SQL, RESTful APIs, and Angular
- Developed single page applications using Angular and a responsive framework (Materialize and Bootstrap)
- Created database driven applications that used SQL, MongoDB, and Firebase
- Was the team lead on many group projects that consisted of 3-5 people with a focus on source control
- Working in an environment that focuses on source control
- Developed an application with a TDD mindset.
- Deployed 5+ applications on Firebase, Heroku, AWS, and Mlab
- Project tracking/management with Trello / LeanKit

Projects

Blogular

Created a CMS using only front end technologies
Used Firebase as a database using the RESTful API
The CMS had a blog, user authentication with Google, and had image storage
Github: github.com/iamtylerd/capstone-blog
Live: www.jttravels.co

Space Race

Created a game that used Node.js as a server
Used Socket.io to allow for multiplayer and many games at once
Rendered HTML on the server with Pug
Github: github.com/iamtylerd/space-race
Live: space-race-.herokuapp.com/
